4 Setting the weekly program

Factory setting of the normal and low fan speed are:

- High fan speed 00:00 to 00:00 Monday to Sunday.
- Normal fan speed 07:00 to 16:00 Monday to Sunday.
- Low fan speed 00:00 to 24:00 Monday to Sunday.
- Settings of 00:00 to 00:00 stops the unit. E.g. changing low fan speed setting from 00:00-24:00 to 00:00-00:00 will stop the unit outside the time of normal fan speed.

Note:

High fan speed has priority over normal fan speed which has priority over low fan speed.

5 I/O Allocation

Note any changes from the factory default input and output allocation configuration. Fill in any related information in the comment field. E.g. a pressure sensors measuring range, a contact's polarity or similar.

Note:

Make notes of any additional connected accessories or external signals in the air handling unit's wiring diagram!
